Bodystyle	Coupe
Transmission	Automatic
Exterior Colour	Grigio Titanio Ferrari
Previous Owners	N/A
Registration	LJ22VOP

### Description

Aston Martin Walton on Thames (HWM) are delighted to bring to market this stunning 2022 Model Year Aston Martin DBS 5.2 V12 Coupe. Supplied by HWM originally it is finished externally in an Aston Martin Q Commission colour called Grigio Titanio. The interior compliments the exterior perfectly with the striking Onyx Black Semi Aniline and Phantom Grey Leather. Factory fitted specification highlights on this 2022 DBS include 21" Forged Gloss Black Alloys, Exposed Grey Brembo Brake Calipers, Carbon Fibre Lower Package, Carbon Fibre Roof, Carbon Fibre Front Splitter and Rear Diffuser as well as Heated Seats, Smoked Rear Lamps, Privacy Glass and 16 Way Electric Front Seats to name just a few. Having covered just under 5800 miles from new this DBS has a full Aston Martin Service History and will come fully prepared by our factory trained technicians along with a 12 Month Aston Martin Warranty and the remainder of the 5 year Service Plan. The front of the DBS features a bumper with a large centre grille compared to the DB11 in order for improved engine cooling along with two air extractors on the sides to cool the brakes and two vents on the hood that aid in the

engine cooling process. The 5.2-litre twin-turbocharged V12 engine delivers at 715hp at 6,500 rpm and 900 Nm of torque from 1,800-5,000 rpm. In order to optimise the centre of gravity and weight distribution, the V12 unit has been positioned as low and as far back in the chassis as possible. The DBS 5.2 V12 Coupe features the ZF 8HP95 transmission with a short final-drive ratio of 2.93:1, in contrast to the DB11's 2.70:1. Chassis-wise, it also comes with torque vectoring and a mechanical limited slip differential for more focused track performance. The DBS also features the same aerodynamics first seen on the DB11 including Aston Martin's innovative Aeroblade system, but refines aerodynamics with an F1-inspired double-diffuser that helps the car generate 180 kg of downforce, the highest figure ever for a series production Aston Martin at that time. Reserve this for £99
